WEATHER INFORMATION.
Last Night's Readings.

The highest barometer is 30.4 inches, at Jacksonville. An area of low barometer extends from Central Texas to Minnesota, with the lowest readings—29.75—at Abilene and Oklahoma.

The weather is generally cloudy, except clear in Nebraska, Northwest to South-west Texas, and at New Orleans.

Nearly all the stations report light showers during the past twelve hours.

General Observations.
Observations taken by the United States weather bureau at 8 p. m., 75th meridian time:

Station	Temp.	Rain-fall.
Jacksonville, Fla.	74	.00
Atlanta, Ga.	70	.00
Montgomery, Ala.	68	.14
Vicksburg, Miss.	72	.00
New Orleans, La.	74	.00
Galveston, Texas	78	.00
Corpus Christi, Texas	78	.00
San Antonio, Texas	78	.00
Nashville, Tenn.	78	.00

Texas—Probably fair and warmer; north to west winds.

Louisiana—Probably fair and warmer; north to west winds.

Mississippi—Probably fair and warmer; north to west winds.

Alabama—Probably fair and warmer; north to west winds.

Georgia—Probably fair and warmer; north to west winds.

Florida—Probably fair and warmer; north to west winds.

South Carolina—Probably fair and warmer; north to west winds.

North Carolina—Probably fair and warmer; north to west winds.

Virginia—Probably fair and warmer; north to west winds.

West Virginia—Probably fair and warmer; north to west winds.

Delaware—Probably fair and warmer; north to west winds.

TODAY'S FEATURES.

Yellow Fever.
The suspicious cases reported at Terry, Miss., not classed as yellow fever. Nitta Yuma had no new cases. Clinton patients better.

At Edwards—Nine new cases and one death reported.

Mississippi State board of health advised the postponement of the opening of the Industrial Institute and College at Columbus until after a general frost.

At New Orleans—The fever situation was no better. Thirty-seven new cases and five deaths were reported. Regular funeral given Mr. Caseaux was attended by an immense throng.

At Mobile—Seven new cases and two deaths; one death at Magazine Point, near the city.

At Vicksburg—One death reported, that of G. S. Smith, whose wife is in a hopeless condition.

At Montgomery, Ala.—A death from eating canned salmon frightened the citizens.

At Biloxi—One death and nine new cases reported. The condition regarded as encouraging.

At McHenry—One new case, that of the wife of Dr. McHenry, reported.

At Scranton—Ten new cases reported. A heavy rain broke the drought.

The report of Dr. Gutierrez as to Galveston cases received at National headquarters.

Dr. Gutierrez said one of the eight cases reported in Galveston was not yellow fever.

Beaumont anxious to continue communication with Houston if Dr. Swearingen is willing.

Dr. Gutierrez reports seven cases in Galveston, having been misinformed as to one. Two of those first down are well.

Some of the local physicians contend that no yellow fever exists in that city.

Reporters not admitted to the Galveston board of health meetings.

Rigid quarantine has been established against Galveston. Some badly scared towns shut out the whole world.

Cuba.
Captain General Blanco will sail from Madrid for Cuba on October 16 and Weyler will return to Spain.

Captain General Weyler issued a decree allowing a number of prominent Cubans to return to Cuba.

The London Times said if Senor Sagasta's reform policy does not disarm American jingoism he might as well have not disturbed Weyler.

The London Standard said the Washington had need to be circumspect or the Cuban struggle might attain wider dimensions.

The London Post accused American big game of trying to force a quarrel between England or Spain to divert attention from political troubles at home.

General Castello announced by General Reuter who lost forty-six Spaniards killed, and sixty wounded, including himself.

The victorious Cubans sack Congress and hanged six soldiers who acted as guides to the Spanish troops.

Foreign.
The resumption of gold shipments in England changed the outlook for the money market.

The sixth anniversary of the death of Charles Stewart Parnell celebrated in Dublin.

Members of the Irish party wanted an extra session of parliament to consider the famine in Ireland.

Domestic.
Commercial relations of the United States with foreign countries showed that the Americans made invaluable inroads in competition in various products.

The United States board adopted the spelling of geographical names in the Klondike region.

Prince Batskinn, Russian delegate to the sealing conference, arrived in Washington.

The United Labor League of Philadelphia would not endorse the candidacy of Henry George for mayor of New York.

State.
C. H. Purcell killed at Cisco by Will Kleiner.

A. J. Buckley and George McCall captured while attempting to burglarize the Hillbroke postoffice.

Rain reported from several points in the State. Heavy downpour in North Texas.

The plant of the Rockdale water works and electric light plant blown to atoms by an explosion. One killed and several injured.

Joseph W. Swann, who killed James H. Foster at his gin, near Chappell Hill, surrenders.

Nebraska Lumber company's plant at Doughty destroyed by fire.

Jim Burch, a young white man, killed by Bob Carter, a negro, at Brenham.

J. R. West kills Thomas C. Bengo, his room mate in the Austin insane asylum.

Railroads.
The Santa Fe offices have temporarily been removed to Cleburne and Fort Worth.

The express companies doing business in Missouri are resisting the effort of the State to reduce their rates.

Change in the train service on account of the quarantine.

Local.
Quarantine against Galveston relaxed. Guards placed out by the county meeting of the board of health.

Drs. Swearingen and Gutierrez expected this morning.

Retail merchants take action on the quarantine situation.

Celebration of German day at Forest park.

Meeting of the Birkor Cholera society.

THE STRICKEN CITIES

Yellow Fever Situation Grows No Better in New Orleans.

NEW CASES IN INFECTED DISTRICTS.

Sanitary Regulations Swept Aside and a Funeral Attended.

SOME OF THE DEATHS SUDDEN

Reports from Mobile, Edwards and Other Cities Show No Abatement.

Gutierrez' Galveston Report.

Yesterday's record:

City	New Cases	Deaths
New Orleans	37	5
Mobile	7	3
Vicksburg	0	1
Biloxi	9	1
McHenry	1	0
Scranton	10	0

New Orleans, October 10.—Official report of the board of health:

Cases of yellow fever today 37; deaths today 5; total cases of yellow fever to date 577; total deaths from yellow fever to date 61; total cases absolutely recovered 240; total cases under treatment 276.

New Orleans, La., October 10.—The fever situation grew no better today. Early in the evening there was promised that yesterday's record would be equalled, if not exceeded. New cases appeared in various portions of the city, many of them, however, being reported in homes where there was already infection.

There were several deaths and in one instance the fatality occurred not long after the report of the case was brought to the attention of the board. Three persons were reported sick in the Call family, on Rousseau street, between Sorapara and First streets, this morning. During the day one of them died. The second death among the cases reported in Algiers was reported today.

Miss Caselair, who was reported today with the fever several days ago. In the other fatal Algiers case the patient was removed to the isolation hospital and died there. Two of the deaths today were in Carrollton, which, relative to population, has furnished more fatal cases than any locality in the city.

Among the new cases is that of Mrs. Sampson. Her husband, Dr. Sampson, and their son were taken ill two or three days ago and the infection has spread in the premises. Another physician is on the list of cases reported today. Dr. Otto Larch, but he is not reported to have a serious attack. Dr. Barnett and Dr. Howard Olliphant are both reported to be progressing favorably towards recovery. Among the new cases is that of A. W. Read, second engineer on the steamship Valdivia. He was taken sick on the vessel and immediately removed to the Toure infirmary. The steamer has been disinfected and extra precautions taken to prevent a spread of the fever among the other members of the crew.

Miss Carrie Hecker, who died today, was only reported ill yesterday. Tonight her mother was announced to have yellow fever. This is the record of new cases and deaths today:

Deaths: Armand Guadiz, 1106 Dante street; Carrie W. Hecker, 7632 Hammond street; Miss Annie Caselair, 526 Elmira, Algiers; Call, Rousseau, between Sorapara and First.

New Cases: Maggie Gaschenne, sent to the Toure infirmary; Dr. Otto Larch, Camp and Orange; Mr. Perry A. Child, 2527 Annunciation; Miss Leonie Billings, 634 Josephine; A. W. Read, sent to Toure infirmary; Miss Corinne Apple, 1516 Thialia; Mrs. Richard Call, Rousseau, near First; Miss Bertha Call, same address; Cleora; Rosale, Claiborne, near Erato; Mrs. J. S. Sander, 7922 St. Charles; Olive Bohne, 1549 Chartres; Allen, 716 Dauphine; Edward Cohen, same address; Henry Schwarm, 1413 North Claiborne avenue; Julius Snyder, 4346 Nashville avenue; Burris Schneider, same address; Claude Barria, 1904 Magazine; Antio Victor, 216 Constance; Mrs. Leroy, sent to Toure infirmary; Miss Mary Call, Rousseau, near First; Miss Belle Brown, 1703 Coliseum; Miss Janina Casey, 5607 Camp; Walter B. Casey, same address; Joe Mutt, 111 Durand; E. P. Otis, 4325 Dryades; John Morem, marine hospital; Edward C. Bay, 2912 Fryantia; David M. Haspel, 1536 Josephine; John F. Foster, 1329 Josephine; John W. Emmett, 1115 Louisiana avenue; Frank Lott, 4632 Laurel; Mrs. Adele Benjamine, 1153 Gravier; Master Fred C. Berrmann, 1153 Laurel; Frank Kileala, 2318 Gravier; Mrs. J. P. Hecker, 7632 Hammond.

Up to tonight President Olliphant has not been officially notified of the existence of yellow fever in Galveston. Dr. Olliphant is, however, in communication with the Galveston authorities and expects to hear from them shortly. In the meantime there is so little traffic between New Orleans and Galveston that there is small danger of the transmission of the infection from one to the other city.

The Marine Hospital service announced today that the camp for plantation laborers will be opened Wednesday next and a surgeon will be put in charge. The camp will be located on the Southern Pacific road some fifteen miles from town and all who go there will be released after ten days' detention and sent into the sugar district.

Governor Foster has placed himself in communication here with the banks, which are the fiscal agents, and has received assurances of their willingness to put up \$50,000 provided the governor is able to show them that a majority of the members of the legislature are willing to pledge themselves to vote for an appropriation covering the amount advanced. Governor Foster is understood to be in favor of giving the money wanted and he is receiving pledges daily from members of the legislature that they will support him.

There was an immense crowd tonight.

FATALITIES AT MOBILE.

Seven New Cases and Three Deaths.

Rain and Cooler Weather.

Mobile, Ala., October 11.—Seven new cases of yellow fever, two deaths in the city and one at Magazine Point, three miles distant, and three recoveries make the record for this city for the past twenty-four hours. The new cases are: Charles Kirkland, 325 Spring Hill avenue; Frank Cox, Royal, near Church; C. A. McKellar, Franklin, corner Canal; William Chioala, Texas, corner Dunham; J. Thornton Bidgood, 207 South Broadway; T. A. Ahrens, Conti, near Broad, removed to city hospital; C. M. Snyder, 5 Kennedy street.

Deaths: Jesse Patchner, 69 Palmetto; George L. Brown, Warren, near North Carolina.

At Magazine Point: Max Semmeier. Recoveries: Mary Otis, M. C. Pelham and J. L. Shifflet.

Total cases, 121; deaths, 29; recoveries, 65; remaining under treatment, 26.

The fever seems well entrenched on Spring Hill avenue.

The end of the fourth week of the visitation sees four infected points, the one just mentioned, the original one, in the neighborhood of Government and Church, the one in the south part of town and that at the city hospital, a little north of Center street.

The chlorine bactericide sent here by J. J. Russell of Chicago has been adopted in practice by Dr. Ketchum, president of the board of health, and several physicians, but its effect as a preventive has not yet been passed upon by them.

There was a light fall of rain this morning and the temperature is somewhat cooler.

REPORT OF GUTIERRES.

Results of Galveston Investigation Received at Headquarters.

Washington, October 10.—Late last night Surgeon General Wyman of the marine hospital received a brief dispatch from Dr. Gutierrez, the yellow fever expert, informing him of the appearance of the disease in Galveston, Texas. The dispatch was as follows:

"Five cases of yellow fever now here; three more have been. Will report to local authorities. I do not apprehend serious trouble here, but dengue causes much confusion."

Dr. Wyman has been in communication with Dr. Fisher of Galveston and State Health Officer Swearingen and has been advised that all necessary precautions have been taken to prevent the spread of the disease.

The officials of the marine hospital service have known for several weeks of the existence of considerable dengue fever in Galveston, but they did not know

ed in the vicinity of the Caseaux residence this morning when the funeral of the head of the household took place. Caseaux died last night and was given a regular funeral today. The crowd showed in a very emphatic way its satisfaction over the sweeping aside of the sanitary regulations of the board, which is opposed to large funerals and congregations of crowds within the vicinity of houses from which bodies are taken. The Caseaux case was reported last evening. Mrs. Caseaux objected to the putting up of a flag and fought officials and police officers for some time. Experts, however, diagnosed the case as yellow fever. It was so late in being reported that there was little chance to save the life of the man and freedom of intercourse between the inmates and the outside world may have had the effect of spreading the infection in the vicinity.

The last St. Claude street flag has been dipped. The fever started on St. Claude, but the board promptly took charge of the infected premises, succeeding in obtaining the co-operation of residents in the vicinity and in the rigid quarantine and sanitation, demonstrating the possibility of stamping out a foot of infection.

The board of health has been enabled to considerably reduce its expenses by its decision to release, without the usual five days' detention, houses wherein the fever has existed. The sanitation force has been gotten in such shape now that fumigation is done promptly and the board is thus put in a position to dispense with many guards who were being stationed to watch houses after they were entirely free of fever.

A dozen people were removed to the detention camp today. There are now a hundred refugees in the camp. The fare has been improved and the accommodations increased.

Today being Sunday, it was not possible to do much in the direction of moving freight. The report of numerous cases and several deaths will have a tendency to make the country towns and surrounding country draw the quarantine lines even tighter than before.

NOT FEVER AT TERRY.

Report of Executive Committee of Mississippi Board of Health.

Jackson, Miss., October 10.—The State board of health tonight issued the following official statement:

Surgeon H. C. Carter of the United States marine hospital service arrived at Terry today from New Orleans and immediately visited the suspected cases of fever with Dr. Grant of Terry. It did not take him long to arrive at a diagnosis of the cases, and he reported that the negro, Cato Kelly, had malarial fever with marked jaundice, and that he did not see a symptom that justified him in thinking that the disease was yellow fever. In fact, he did not regard the case even suspicious.

The report from Nitta Yuma is that there are no new cases; Mrs. Smith no better and in a very dangerous condition, others doing well.

The following report was received from Clinton:

"I have to report the case of Miss Miller as imported fever. She was reported yesterday as doubtful." Miss Miller is a sister of Dr. Miller and is quite ill. The case formerly reported as probably intermittent, is almost free from fever. Dr. Miller is better.

Dr. Dunn sent the following report from Edwards:

"Weather warm, cloudy and, while we can see rain in the distance, none fell here. There have been reported nine cases of yellow fever, five white and four colored. Three cases seriously ill, one critically so. One death, Mr. John Young. All other cases doing fairly well."

"Father Prendergast is sitting up today."

A letter was received from President Pugh of the Industrial Institute and College at Columbus, Miss., asking if a killing frost should be had at Columbus and not in the section of the State in which there was yellow fever, would it be safe to announce at once the opening of the college. The board replied that in their opinion it would not, and recommended that the opening be postponed until after a general frost in the State.

J. F. Hunter, M. D., Executive Committee, State Board of Health.

FATALITIES AT MOBILE.

Seven New Cases and Three Deaths.

Rain and Cooler Weather.

Mobile, Ala., October 11.—Seven new cases of yellow fever, two deaths in the city and one at Magazine Point, three miles distant, and three recoveries make the record for this city for the past twenty-four hours.
